Summary

Frontend Developer | Cybersecurity Professional | Blue Team Enthusiast | Continuous Learner

Resourceful, proactive, and highly motivated cybersecurity professional with a passion for tackling the evolving challenges that organizations face in securing their digital landscapes. Eager to learn, adapt, and contribute to the ever-changing field of information security.

With over 2+ years of hands-on experience as a React frontend developer, I bring a unique blend of skills to the world of cybersecurity. My proficiency in web application programming enhances my ability to understand and fortify the vulnerabilities in digital systems.

As an advocate for the Blue Team, I thrive in the dynamic intersection of technology and organization, embracing the technical intricacies while fostering a proactive security posture. With a background in banking, customer care, and web application programming, I bring a holistic perspective to cybersecurity.

I'm honored to have collaborated with esteemed institutions such as the Azerbaijan Cyber Security Center and my affiliation with Technion - Israel Institute of Technology. My commitment extends to playing an active role in nurturing the Information Security community in Azerbaijan, a vital foundation for our digital future.

Certified in Cybersecurity, Web Application Penetration Testing, Data Protection, Introduction to Image File Forensics, and Open-source Intelligence by (ISC)2, I am driven by a thirst for knowledge and a desire to excel in this ever-evolving landscape.

My interests extend beyond the technical realm into Governance, Risk Management, and Compliance (GRC), demonstrating a comprehensive approach to safeguarding digital assets.

Let's connect and collaborate in fortifying our digital world against emerging threats. Together, we can shape the future of cybersecurity.
